

# Media Briefing 2019

**'One of the hottest tickets in the property calendar', Cambridge News**  
**In 10 years of Open Eco Homes we've given 4000 home tours around 76 homes**

**Open Eco Homes is 10! Along with SuperHomes it is the longest running Open Eco Homes event in Britain.**

Our mission is to help ordinary householders to share their excitement and passion for low energy homes through workshops and open home events.

**You can see how it works by viewing our quick one-minute video tour:**

[www.openecohomes.org](http://www.openecohomes.org)

**In 2019 we plan to open 12 homes to visitors on Sunday 22<sup>nd</sup> and Saturday 28<sup>th</sup> September.** We will also be hosting a series of events and workshops for Open Eco Home visitors, including a special 10<sup>th</sup> anniversary celebration.

---

Cambridge Open Eco Homes is part of a national Open Eco Homes movement that recognizes the importance of direct energy conversations between existing and potential users of low and smart energy technologies. [www.greenopenhomes.net](http://www.greenopenhomes.net)

Visitors come away feeling inspired to change, and empowered with the information they need to make that change. They learn how to save energy, make their home more comfortable and reduce their carbon emissions. People are more likely to make improvements themselves if they see it working for real in someone else's beautiful comfortable home. And this is great for the environment.

---

**"OEH is invaluable. Hearing the stories, seeing the finished or unfinished homes, being able to feel the materials and ask questions all greatly added to my knowledge and enthusiasm."**

A Cambridge Open Eco Homes visitor in 2016

Using feedback given in visitor surveys we estimate that **722 tonnes of CO<sub>2</sub> will be saved as a result of home energy improvements** inspired by Open Eco Homes in 2018 (data and calculations available on request).
